C-Tech Network Cabling: Copper Based Systems

Aligned Program of Study: Networking Systems

Description
The C-Tech Training System is a proven model for success in hands-on technology education. C-Tech programs are addressing the current Skilled Labor Gap in IT and other technology fields by training the workforce of tomorrow. C-Tech certifications are available to students who successfully complete the C-Tech curriculum through a certified school taught by a certified trainer. The C-Tech Network Cabling: Copper Based Systems Certification covers the basics of copper cabling, installation, construction, and troubleshooting using patented workstations. It also includes up-to-date industry standards and real-world workplace simulations.

Certification Information
Test Owner
C-Tech Associates Inc.
50 Station Road
Sparta, NJ 07871
(973) 726-9000
hello@c-techtraining.com

Testing Sites/Centers
The exam must be given at a certified center.

Preparing to offer the certification
Required Instructor Qualifications
C-Tech requires all instructors teaching their courses to attend a short training session. To teach a certified program, instructors must attend a session conducted by their Master Trainer, either at the C-Tech headquarters or private training that can be held at your facility.

Exam Details
The school must have the tools and certified teacher to administer the certification testing.

Materials and Resources
More information is available https://ctechprograms.com/

Vendors with Data Sharing MOU with TDOE
TDOE does not currently have a data-sharing agreement with any C-Tech vendors, therefore the burden of proof to provide evidence of earning the certification will be on the school system.
