

Certified Patient Care Technician

Aligned Program of Study: Nursing Services

Description

Doctors, nurses, and other healthcare professionals rely on Patient Care Technicians/Assistants to assist with the critical day-to-day care some patients require. The CPCT/A provides hands-on assistance to serve the patients' basic needs, as well as work alongside other healthcare professionals. More and more patients require special care, sometimes around-the-clock. Needs vary from patient to patient, making it vital that the Patient Care Technician/Assistant has a diverse range of knowledge and skills to provide their basic care. Note: This certification is not interchangeable with a Certified Nursing Assistant. For employment in a long-term care facility, caregivers must be Certified Nursing Assistants.

Preparing to offer the certification

Required Instructor Qualification

This course can only be taught by an instructor with a Health Science endorsement.

Exam Details

Unlike the Certified Nursing Technician test, this test is knowledge-based. There is no skills portion.

Vendors with Data Sharing MOU with TDOE

<p>Materials, resources, registration, testing sites, test details, and prices vary by vendor. The following vendors are accredited by the <i>Institute for Credentialing Excellence</i>.</p> <p>* indicates a data-sharing agreement MOU with TDOE</p>		
Test Owner	Test Vendor	Test Information
National Center for Testing Competency	National Center for Testing Competency	Test handbook
National Healthcareer Association*	PSI Exams	Online instructions

Other things to consider when selecting a vendor

Accreditation is the process by which a credentialing or educational program is evaluated against defined standards and is awarded recognition if it complies with those standards. The Institute for Credentialing Excellence (ICE) currently offers accreditation to professional certification programs through the National Commission for Certifying Agencies (NCCA), which is recognized by the Department of Defense. All Health Science promoted industry certification credentialing companies are accredited through ICE.
