The Joint Task Force on Children’s Justice and Child Sexual Abuse (JTF) was created by statute in 1985 by the Tennessee General Assembly, which enacted legislation requiring the Tennessee Department of Children’s Services (TDCS) to develop a task force to address the state’s response to child sexual abuse and other forms of severe abuse—detection, intervention, prevention, and treatment. TDCS works closely with the JTF, a group of child welfare, juvenile justice, and mental health professionals, and representatives from state child-serving agencies throughout Tennessee who are appointed by the TDCS commissioner to help fulfill this task.

The Tennessee Department of Children’s Services (DCS) has adopted a definition of child sexual abuse that includes “any sexual acts involving a child under the age of 13 or was under the age of 13 when the abuse occurred, or a child is age 13 – 18 and meets the relationship criteria per the Department’s policy.”¹ Child sexual abuse includes acts that produce sexual arousal and/or gratification for the perpetrator involving the following:

- Explicit sexual acts;
- Vaginal, oral, anal or digital penetration with or without the use of an object;
- Touching, fondling, molestation or intentional contact with genitals, buttocks or breasts of child or perpetrator. This also includes when adolescents or adults instruct children to engage in such behaviors with each other;
- Indecent exposure and voyeurism; and
- Intentionally exposing a child to sexually explicit material.²

Child sexual abuse also means sexual behaviors or situations in which the motivation may or may not be sexual, but there is a clear sexual component such as:

- Taking pictures or videos of children engaging in sexual activities or in sexually explicit poses;

¹ Tennessee Department of Children’s Services <https://files.dcs.tn.gov/policies/chap14/WA1.pdf>

² Text for Footnote No. 2

- Making children available to others for sexual purposes;
- The sexual gratification or benefit of an adult;
- Use of a child for prostitution; and
- Caregiver has knowledge or reasonable suspicion of child sexual abuse by another person and intentionally fails to intervene or protect child.

*Child sexual abuse is **more prevalent** than the U.S. public would like to believe. It is widespread, **children of all ages, races, and ethnicities experience child sexual abuse.***

Here are some other key findings from the CDC about child sexual abuse:³

One in four girls and **one in 13 boys** experience child sexual abuse at some point in childhood.

Most children are **sexually abused by someone they know and trust.**

In 2019, there were **over 41 million videos of child sexual abuse reported compared to five years** ago when there were less than 350,000.

Physical force is very rarely used, rather the offender uses manipulation such as bribes, gifts and games.

More than 80% of child sexual abuse cases never come to the attention of Child Protective Services (CPS) or law enforcement.

Children often do not tell because they are afraid they will not be believed or they worry about what a disclosure would do to their family.

There is no typical offender—they come from all walks of life. It happens not only in impoverished areas but in affluent communities as well.

What is Erin's Law?

Erin's Law focuses on preventing child sexual abuse and was signed into law in Tennessee in 2014. This law encourages schools across the state to provide age-appropriate instruction to students on personal body safety and how to report sexual abuse, including such abuse which may occur in the child's home for grades K-12. The bill is named after Erin Merryn, an Illinois native who was sexually abused as a child. For more information on Erin's Law, please visit <http://www.tn.gov/sos/acts/108/pub/pc0706.pdf> and www.erinslaw.org.

Child Sexual Abuse Prevention Curricula

Erin's law emphasizes the importance of educational programs that help prevent sexual abuse by using age-appropriate techniques to instruct children on how to recognize and report sexual abuse. Recognizing the need to provide school personnel with a diversity of curricula and resources, the JTF in partnership with both state departments of Education and Children's Services reviewed a variety of existing prevention curricula; and has identified a number of free or low cost resources and trainings that Tennessee public schools can utilize to train school personnel who interact with children and youth on how to prevent, recognize, and respond appropriately to child sexual abuse. While the resources in this document are primarily intended to help school districts, it is the hope of the JTF that other professionals working with children and youth could also use this document as a point of reference. The JTF does not promote any specific prevention curriculum or training, but rather identifies existing resources from state and other agencies on child sexual abuse prevention instruction for grades Pre-K-12.
