

## Section 103 PM<sub>2.5</sub> Air Monitoring Grant Annual Performance Report

Name of Grantee: Chattanooga-Hamilton County Air Pollution Control Bureau

Reporting Period: January 1, 2020 - December 31, 2020

Project Objectives and Alignment with EPA Strategic Plan:

The primary objective of this project is to collect quality assured data on ambient air concentrations of fine particulate matter and its precursors. The data will be used for: 1) comparisons of the NAAQS for PM<sub>2.5</sub>, 2) development and tracking of implementation plans, 3) assessments of regional haze, and 4) assistance for health studies and other ambient aerosol research activities.

This project supports EPA's Strategic Plan Goal 1 A Cleaner, Healthier Environment (Deliver a cleaner, safer, and healthier environment for all Americans and future generations by carrying out the Agency's core mission) and Objective 1.1 (Improve Air Quality: Work with states to accurately measure air quality and ensure that more Americans are living and working in areas that meet high air quality standards), by implementing a variety of monitoring activities that will assist in achieving and maintaining health based air pollution standards to reduce the direct emission of particulate matter and other criteria air pollution from stationary and mobile sources that are protective of human health. The environmental outcome will be reduced incidences of respiratory illnesses including asthma and lung cancer and improved visibility in scenic parks and wilderness areas.
