

STATE OF TENNESSEE  
DEPARTMENT OF TENNESSEE WILDLIFE RESOURCE AGENCY

**REQUEST FOR PROPOSALS # 32801-12514  
AMENDMENT #1  
FOR GENERATOR SERVICES**

**DATE: October 20, 2022**

**ITB # 32801-12514 IS AMENDED AS FOLLOWS:**

**1. State responses to questions and comments below amend and clarify this ITB.**

Any restatement of ITB text in the Question/Comments shall NOT be construed as a change in the actual wording of the ITB document.

PAGE #	QUESTION / COMMENT	STATE RESPONSE
	1. In the Specifications document, under A.4 & A.5, there are herbicide mixes listed for control of various weeds. One mix for Curly-leafed pondweed is listed as a minimum of 1.5 gallons of diquat dibromide and 3 gallons of copper per acre. However, on the Event Details document, the Line 1 Description states "Weed control, Aquatic spraying with copper, Curly-leafed pondweed". It also doesn't specify amounts. Shouldn't the line in the Event Details match the Specifications document?	Specifications updated to provide descriptions with each line item number.
	2. Line 4 in the Event Details document states "Weed control, Aquatic spraying using Glyphosate, etc." Is this meant to mean Glyphosate plus imazapyr plus methylated seed oil at the rates listed in the Specs document?	Specifications updated to provide descriptions with each line item number.
	3. Line 5 in the Even Details document states "Weed control, 1.5 gal diquat + 1 gal endothall". I assume this is to target Curly-leafed pondweed as well? That would make sense, but it is not specified.	Yes, this is to target Curly-Leafed Pondweed.

2. The current Specification document is being removed, and the new Specification document is being added, with changes highlighted.

3. **ITB Amendment Effective Date.** The revisions set forth herein shall be effective upon release. All other terms and conditions of this ITB not expressly amended herein shall remain in full force and effect.
