

STATE OF TENNESSEE
DEPARTMENT OF TENNESSEE WILDLIFE RESOURCE AGENCY

**REQUEST FOR PROPOSALS # 32801-12524
AMENDMENT #1
FOR TWRA Vivrette Creek Pier**

DATE: November 15, 2022

ITB # 32801-12524 IS AMENDED AS FOLLOWS:

1. State responses to questions and comments below amend and clarify this ITB.

Any restatement of ITB text in the Question/Comments shall NOT be construed as a change in the actual wording of the ITB document.

PAGE #	QUESTION / COMMENT	STATE RESPONSE
	1. On 2.03.A you are wanting hinges on both ends of the gangway. This will not work on a typical floating structure as the lateral change in the dock when the water goes up or down will cause binding of the spud pole in the pile guide. Th only way to avoid this is to make "sloppy hoop-style pile guides that will allow for this additional movement - Doing this will decrease the stability of the pier. A simple solution is to allow rollers on one end of the gangway (abutment end or dock end) to compensate for the lateral movement without loss of stability.	Rollers are acceptable.

2. **ITB Amendment Effective Date.** The revisions set forth herein shall be effective upon release. All other terms and conditions of this ITB not expressly amended herein shall remain in full force and effect.
