		<p>1. The spec says these tables are to be "fully welded". Can you please confirm that the facility has enough clearance to bring a fully welded table through? This would be 80" Wide x 80" Deep x 30" Tall table . Going around any corners would be hard. Do you have a drawing showing the facility layout you can send me and show the path the installers would have to walk with the tables and show the places these tables are to be installed?</p> <p>95% of the time these style tables ship in pieces. The tables tops ship together, the seat tops ship together, and the legs ship together. The Anchor for the tables in the Norix tables goes down the shaft of the leg. The seat tops are bolted on and not welded on. The drawing SLTR-54-12SS is how to Norix Tables will assemble. We can make these tables so everything is welded together but the facility would have to have A LOT of Clearance in order to bring these tables in the facility.</p>	<p>It is acceptable for the Contractor to send the product in pieces as there are door size restrictions within the facility.</p>
		<p>2. Does that Tabletop have to be Round or would you accept an octagon shape or a rectangle shape?</p>	<p>Tables must be round</p>
		<p>3. Does the table have to have spider legs or would a pedestal style table work?</p>	<p>Spider Legs, please see item 2 below updating the specifications.</p>

2. Delete ITB Specifications named as Attachment StainlessSteelRoundtable.pdf in its entirety and insert the following in its place (any sentence or paragraph containing revised or new text is highlighted):
