

**SWC# 215 – Liquefied Propane Contact
Information and Special Instructions**

Summary/Background Information: This statewide contract covers those products commonly referred to as liquefied petroleum gases (LPG) applicable to products intended for use as domestic, commercial, industrial and engine fuels (hd5). It includes the purchase and delivery of propane. There are two Contractors, who have been awarded counties across Tennessee. This is not a fixed-price contract; it is an indexed price contract.

SWC 215 authorized users should use their local purchasing authority to procure tanks and should not attribute the purchase to the contract.

(610) 768-7608 / andrew.fedynyshyn@amerigas.com

- Handles all sales related items to include requests for quote, pricing requests and high-level issues

Gas Emergency – after hours or weekend

(888) 528-9475, press Option 1

- Manned 24/7
- Reference Account #

When emailing one of the above contacts, please include in *Subject* line - the Account # and reason for email such as Missing Delivery Ticket or Delivery Request

Due to the large volume of emails AmeriGas receives, this will help easily identify the customer and reason for the request.

Contract Period:

Total Number of Years if all Options are exercised: 5

- Start Date: October 1, 2022
- Initial End Date: September 30, 2025
- Final End Date: September 30, 2027

Special Instructions:

SWC 215 was awarded by TDOT region. Lines items contain the following information:

- Region
- Unit of Measure (UOM)
- Number of Gallons Purchased (0-4999 or 5000+)
- Price (Mark-up)

EXAMPLE:

Line No.	Item ID	Description	Region	UOM	Mark-up
1	1000138706	Gas, Propane (LPG) 0-4999 gal	Region 1	GA	\$0.39
2	1000138720	Gas, Propane (LPG) 5000+ gal	Region 1	GA	\$0.19

Each region has two-line items which consist of the fuel ranges and pricing. The pricing for each line item consists of a “mark-up,” which is the delivery fee, to the associated region, for the propane. This price is added to the price of propane per gallon. Like other fuel pricing, the pricing of propane is not fixed and fluctuates daily. Please contact the Contract Administrator for directions on how to obtain the daily fuel price. Further instructions for how to use SWC 215 are below.

Pricing for a gallon of propane is calculated by adding the mark-up price to the OPIS Propane Price.

EXAMPLE

OPIS Price + Contract Price (Mark-up) = Total Propane Price for One Gallon

Verifying the Propane (LGP) Order Price:

The procedure for verifying the order price is as follows:

1. Determine the day that the propane was delivered and use the OPIS price per gallon of the previous day. AmeriGas and Marsh both have systems that lag one day. For example, if propane was delivered to your facility on 5/7/2024, then use the 5/6/2024 OPIS price per gallon to determine the order price. Please reach out to the contract administrator for instructions on how to receive the daily OPIS prices.
2. Next, pull up the contracts and find the mark-up price based on number of gallons ordered and the region you are in. AmeriGas serves TDOT regions 2, 3, and 4. Marsh serves TDOT region 1.
3. Add the mark-up price and the OPIS price per gallon together for the Total Propane Price.
4. Multiply the Total Propane Price by the number of gallons of propane received to derive the total payable amount.
5. Compare this price to the price on the invoice.

Requisition and Purchase Order Generation:

For information on how to create a requisition and/or purchase order please click on the “Agency Upgrade User Guide” link on the following page:
