0520-01-09-.02 DEFINITIONS.

- (1) "Charter school" means a public charter school as defined at T.C.A. § 49-13- 104.
- (2) "Child with a Disability" means
 - (a) Children with disabilities and youth between three (3) and twenty-one (21) years of age, inclusive who have been evaluated in accordance with 34 C.F.R §§300.304 through 300.311, TCA § 49-10-102 and regulations of the State Board of Education. Any child with a disability who attains twenty-two (22) years of age subsequent to the commencement

of a school year continues to be a child with a disability for the remainder of that school year.

- (b) A child with intellectual disability, a hearing impairment (including deafness), a speech or language impairment, a visual impairment (including blindness), emotional disturbance, orthopedic impairment, autism, traumatic brain injury, other health impairment, specific learning disability, multiple disabilities, deaf blindness, developmental delay, functional delay, and intellectually gifted and who, by reason thereof, needs special education and related services.
- (3) "Autism" means a developmental disability, which significantly affects verbal and nonverbal communication and social interaction, generally evident before age three (3) that adversely affects a child's educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experience. The term does not apply if a child's educational performance is adversely affected primarily because the child has an Emotional Disturbance, as defined in this section.

The term of Autism also includes students who have been diagnosed with an Autism Spectrum Disorder such as Autism, a Pervasive Developmental Disorder, or Asperger's Syndrome when the child's educational performance is adversely affected. Autism may exist concurrently with other areas of disability.

A child could be found to be Autistic if the child manifests these characteristics in early childhood (as social demands increase). Children with Autism demonstrate both of the following characteristics (i.e., (a) and (b) below):

- (a) Persistent deficits in social communication and social interaction across multiple contexts, as manifested by all of the following:
 1. Deficits in social-emotional reciprocity (e.g., abnormal social approach, failure of normal back and forth conversation, reduced sharing of interests, reduced sharing of emotions/affect, lack of initiation of social interaction, and poor social imitation);
 2. Deficits in nonverbal communicative behaviors used for social interaction (e.g. impairments in social use of eye contact, use and understanding of body postures, use and understanding of gestures; abnormal volume, pitch, intonation, rate, rhythm, stress, prosody, and/or volume of speech; abnormal use and understanding affect, lack of coordinated verbal and nonverbal communication, and lack of coordination nonverbal communication); and
 3. Deficits in developing and maintaining relationships appropriate to developmental level; ranging from difficulties adjusting behavior to social contexts, through difficulties in sharing imaginative play, to an apparent absence of interest in people.And
- (b) Restricted, repetitive patterns of behavior, interests, or activities as manifested by at least two of the following:
 1. Stereotyped or repetitive speech, motor movements, or use of objects (e.g., echolalia, repetitive use of objects, idiosyncratic language, simple motor stereotypies);
 2. Excessive adherence to routines, ritualized patterns of verbal or nonverbal behavior, or excessive resistance to change (e.g., motor rituals, insistence on same route or food, repetitive questioning, or extreme distress at small changes);

3. Highly restricted, fixated interests that are abnormal in intensity or focus (e.g., strong attachment to or preoccupation with unusual objects, excessively circumscribed or perseverative interests); or
 4. Hyper-or hypo-reactivity to sensory input or unusual interest in sensory aspects of environment (e.g., apparent indifference to pain/heat/cold, adverse response to sounds or textures, excessive smelling or touching of objects, fascination with lights or spinning objects).
- (4) "Deaf-Blindness" means concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs by addressing any one of the impairments. A child with deaf-blindness shall be:
- (a) A child who meets criteria for Deafness or Hearing Impairment and Visual Impairment; and
 - (b) A child who is diagnosed with a degenerative condition or syndrome which will lead to Deaf-Blindness, and whose present level of functioning is adversely affected by both hearing and vision deficits; or
 - (c) A child with severe multiple disabilities due to generalized central nervous system dysfunction, and who exhibits auditory and visual impairments or deficits which are not perceptual in nature.
- (5) "Deafness" means a hearing impairment that is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification that adversely affects a child's educational performance. The child has:
- (a) An inability to communicate effectively due to Deafness; and/or
 - (b) An inability to perform academically on a level commensurate with the expected level because of Deafness; and/or
 - (c) Delayed speech and/or language development due to Deafness.
- (6) "Developmental Delay" refers to children aged three years, zero months (3:0) through nine years, eleven months (9:11) who are experiencing developmental delays, as measured by appropriate diagnostic instruments and procedures, in one (1) or more of the following areas: physical (gross motor and/or fine motor), cognitive, communication, social or emotional, or adaptive development that adversely affects a child's educational performance. Other disability categories shall be used if they are more descriptive of a young child's strengths and needs.. Initial eligibility as Developmental Delay shall be determined before the child's seventh birthday. The use of Developmental Delay as a disability category is option for local school systems.
- (7) "Emotional Disturbance" Emotional disturbance means a condition exhibiting one (1) or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's educational performance:
- (a) Inability to learn which cannot be explained by intellectual, sensory, or health factors;
 - (b) Inability to build or maintain satisfactory interpersonal relationships with peers and school personnel;
 - (c) Inappropriate types of behavior or feelings under normal circumstances;
 - (d) General pervasive mood of unhappiness or depression;

- (e) Tendency to develop physical symptoms or fears associated with personal or school problems.

Emotional Disturbance includes schizophrenia. The term does not apply to children who are socially maladjusted, unless it is determined that they have an emotional disturbance.

- (8) "Functional Delay" means a continuing significant disability in intellectual functioning and achievement that adversely affects the student's ability to progress in the general education program, but the student's adaptive behavior in the home or community is not significantly impaired and is at or near a level appropriate to the student's chronological age. Such disabilities include one or more of the following:

- (a) Significantly impaired intellectual functioning which is two (2) or more standard deviations below the mean, and difficulties in the following areas cannot be the primary reason for significantly impaired scores on measures of intellectual functioning:

1. Limited English proficiency;
2. Cultural factors;
3. Medical conditions that impact school performance;
4. Environmental factors;
5. Communication, sensory or motor disabilities;

- (b) Deficient academic achievement which is at or below the fourth percentile in two (2) or more total or composite scores in the following areas:

1. Basic reading skills;
2. Reading fluency skills;
3. Reading comprehension;
4. Mathematics calculation;
5. Mathematics problem solving;
6. Written expression; or

- (c) Home or school adaptive behavior scores that fall above the level required for meeting Intellectual disability eligibility standards.

Other disability categories shall be used if they are more descriptive of student strengths and needs. The team must determine that underachievement is not primarily the result of Visual, Motor, or hearing Disability, Intellectual Disability, Speech or Language Impairment, or a Specific Learning Disability.

- (9) "Hearing Impairment" means an impairment in hearing, whether permanent or fluctuating, that adversely affects a child's educational performance but does not include Deafness.

A hearing impaired child shall have one (1) or more of the following characteristics:

- (a) Inability to communicate effectively due to a Hearing Impairment;

- (b) Inability to perform academically on a level commensurate with the expected level because of a Hearing Impairment; or
 - (c) Delayed speech and/or language development due to a Hearing Impairment.
- (10) “Intellectually Gifted” means a child whose intellectual abilities, creativity, and potential for achievement are so outstanding that the child’s needs exceed differentiated general education programming, adversely affect educational performance and requires specifically designed instruction or support services. Children from all populations (e.g., all cultural, racial, and ethnic groups, English Learners, all economic strata, twice-exceptional, etc.) can be found to possess these abilities. Children identified as intellectually gifted are exempted from the discipline procedures at 34 C.F.R. §300.530-537. Children with a dual diagnosis that includes intellectually gifted must be considered as children with a disability and may not be exempted from the discipline procedures at 34 C.F.R. §300.530-537.
- (11) “Intellectual disability” is characterized by significantly impaired intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period that adversely affects a child’s educational performance.
- (12) “Multiple Disabilities” means concomitant impairments (such as Intellectual disability- Deafness, Intellectual disability-Orthopedic Impairment), the combination of which causes such severe educational needs that they cannot be accommodated by addressing only one (1) of the impairments. The term does not include Deaf-Blindness.
- (13) “Orthopedic Impairment” means a severe orthopedic impairment that adversely affects a child’s educational performance. The term includes, but is not limited to, impairments caused by congenital anomaly (e.g. club foot, absence of some member), impairments caused by disease (e.g., poliomyelitis, bone tuberculosis), and impairments from other causes (e.g. cerebral palsy, amputations, and fractures or burns that cause contractures).
- (14) “Other Health Impairment” means having limited strength, vitality or alertness, including a heightened alertness to environmental stimuli, that results in limited alertness with respect to the educational environment, that is due to chronic or acute health problems such as asthma, Attention Deficit Hyperactivity Disorder, diabetes, epilepsy, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, and Tourette’s Syndrome that adversely affects a child’s educational performance.

A child is “Other Health Impaired” who has chronic or acute health problems that require specially designed instruction due to:

 - (c) Excessive health related absenteeism; or
 - (d) Medications that affect cognitive functioning.
- (15) “Specific Learning Disability” means a disorder in one (1) or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest itself in the imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations, and that adversely affect a child’s educational performance. Such term includes conditions such as visual processing (perceptual) disabilities, brain injury that is not caused by an external physical force, dyslexia, and developmental aphasia. Specific Learning Disability does not include a learning problem that is primarily the result of Visual Impairment, Hearing Impairment, Orthopedic Impairment, Intellectual disability, Emotional Disturbance, limited English proficiency, or environmental or cultural disadvantage.

- (16) "Speech or Language Impairment" means a communication disorder, such as stuttering, impaired articulation, a language impairment, or voice impairment that adversely affects a child's educational performance.

Speech or Language Impairment includes demonstration of impairments in one (1) or more of the following areas of language, articulation, voice, or fluency:

- (a) Language Impairment – A significant deficiency in comprehension and/or use of spoken language that may also impair written and/or other symbol systems and is negatively impacting the child's ability to participate in the classroom environment. The impairment may involve any or a combination of the following: the form of language (phonology, morphology, and syntax), the content of language (semantics) and/or the use of language in communication (pragmatics) that is adversely affecting the child's educational performance;
- (b) Articulation (Speech Sound Production) Impairment – A significant deficiency in ability to produce sounds in conversational speech not consistent with chronological age. This includes a significant atypical production of speech sounds characterized by substitutions, omissions, additions, or distortions that interfere with intelligibility in conversational speech and obstructs learning and successful verbal communication in the educational setting. Speech sound errors may be a result of impaired phonology, motor or other issues;

- (d) Fluency Impairment – Abnormal interruption in the flow of speech characterized by an atypical rate or rhythm, and/or repetitions in sounds, syllables, words, and phrases that significantly reduces the speaker's ability to participate within the learning environment.

Speech or Language deficiencies identified cannot be attributed to characteristics of second language acquisition, cognitive referencing, and/or dialectic differences.

- (17) "Traumatic Brain Injury" means an acquired injury to the brain caused by an external physical force, resulting in total or partial functional disability or psychosocial impairment, or both, that adversely affects a child's educational performance. The term applies to open or closed head injuries resulting in impairments in one (1) or more areas, such as cognition; language; memory; attention; reasoning; abstract thinking; judgment; problem-solving; sensory, perceptual, and motor abilities; psychosocial behavior; physical functions; information processing; and speech. The term does not apply to brain injuries that are congenital or degenerative, or to brain injuries induced by birth trauma.

Traumatic Brain Injury may include all of the following:

- (a) An insult to the brain caused by an external force that may produce a diminished or altered state of consciousness; and
- (b) The insult to the brain induces a partial or total functional disability and results in one (1) or more of the following:

To meet this obligation each LEA shall:
 - (a) Identify, locate, and evaluate all children with disabilities;
 - (b) Develop and implement child find activities to ensure that all children – including highly mobile children (migrant and homeless children) and those children who are suspected of being a child with a disability, even though they are advancing from grade to grade – are identified, located and evaluated; and

Instruction provided to children with disabilities in homebound placements shall be provided by qualified personnel, pursuant to IDEA and state regulations.
- (2) Eligibility for Homebound Placements.

- (a) Eligibility for instruction as a child with a disability pursuant to IDEA and state regulations shall be established prior to implementation of homebound services. Children with medical conditions of a short duration or temporary nature, and not previously certified as eligible pursuant to IDEA and state regulations, shall not be eligible for homebound placements pursuant to this regulation, and special education funds shall not be used to fund homebound placements for such children.
 - (b) The IEP team shall consider a medical homebound placement only upon certification by a licensed doctor of medicine or osteopathy that a child with a disability needs a homebound placement, is expected to be absent from school due to a physical or mental condition for at least (10) consecutive school days and that the child can receive instruction in a homebound placement without endangering the health of personnel providing it.
- (3) Use of Homebound Placement.
- (a) All homebound placements shall be temporary. Homebound placements shall not exceed thirty (30) school days duration. The IEP shall contain a goal of returning the child to a less restrictive environment within the school year, unless there is a medical necessity that requires extended homebound instruction, in which case additional homebound placements of thirty (30) school days or less may be instituted.
 - (b) An IEP containing a homebound placement shall be reviewed at intervals of thirty (30) school days by the child's IEP team to ensure appropriateness of the provision of instruction and appropriateness of continuing the homebound placement.
 - (c) Where behavioral and/or disciplinary issues cannot be safely addressed in any other educational setting, the IEP team may consider a homebound placement. Such changes in placement may be instituted strictly on an emergency basis and for a temporary period of time not to exceed thirty (30) school days to determine how to best address the child's needs. The IEP team must document that a homebound placement is necessary, temporary and consistent with requirements for the provision of a free appropriate public education.
 - (d) The frequency and duration of instruction necessary to provide a free appropriate public education (FAPE) during a homebound placement will be determined by the IEP team.
 - (e) IDEA Part B funds may be expended only for instruction in homebound placements of children with disabilities who are eligible for special education pursuant to IDEA and state regulations.

 - (a) Identifies, locates, and evaluates all children who are suspected of having disabilities, including children attending non-public schools, regardless of the severity of their disabilities, and who may be in need of special education and related services. These services may be provided to children with disabilities under early transition agreements who are not yet three (3) years of age. The LEA may reduce the level of expenditures below the level for the preceding year if the reduction is attributable to the following:

The preceding December 1 census count is used in calculating private and public school ratios to determine the proportionate amount.
- (3) The curriculum adopted by the State Board of Education shall serve as the basis for developing educational programs. Each LEA must provide a variety of services, interventions and programs to meet the educational needs of all students including the needs of children with disabilities.

 - (iii) Disaggregated data on the performance of children with disabilities.
- (4) Each LEA shall maintain an accurate record of all children with disabilities ages three (3) through the school year a student turns twenty-two (22) years of age who are residing within its jurisdiction. The census shall be taken on December 1 of each year and at other times as required.
