INSTRUCTIONAL BULLETIN NO. 04-18

Regarding Addition of Erosion and Sediment Control Plans into Field Review and Final ROW Plans

Effective October 1, 2004, Erosion and Sediment Control Plan sheets shall be included in the plans submitted for Right-of-Way Appraisals and Acquisition. Erosion and Sediment Control Plan sheets shall also be included in right-of-way field review and construction field review plans. Erosion and Sediment Control Plan sheets shall immediately follow the Culvert Cross Sections. The Erosion and Sediment Control Plan should be complete to the extent possible, however, quantity tabulations and will not be required until printed for construction field review.

Once plans are formally submitted, any changes to the Erosion and Sediment Control Plan sheets due to design revisions, right-of-way revisions, permit requirements, mitigation requirements, ecological evaluation requirements, erosion control notes revisions, addition or deletion of sheets, ect. will require a formal plan revision.

The Design Manager should contact the Technical Studies Section of the Environmental Planning and Permits Division when Erosion and Sediment Control Plans are revised to determine if revised plan sheets or other information is needed.
